

# **SPECIAL NOTICE REGARDING SUMP PUMPS**

Brookings Municipal Utilities is asking residents of Brookings to continue routing their sump pump hoses outside until November 15th. Brookings Utilities has extended this timeframe from October 15th to November 15th due to the excessive rainfall that has occurred in the Brookings area. The Brookings Wastewater Treatment System continues to experience heavy flows and this will aid our wastewater treatment operations. After November 15th, you may move your hoses inside and drain them into the sanitary sewer until March 15, 2011.

*We want to thank you for  
cooperating with this change.*
