

**BROOKINGS**  
municipal utilities

Brookings does not have a shortage of water. However, our aging water treatment plants do have limits when demand is highest – during late spring and summer months.

**To insure an adequate supply of clean water at all times for all uses, lawn watering restrictions will begin June 1st.**  
*(See details at right.)*

This policy only applies to lawn watering. Other water usage, including watering of vegetable and flower gardens, is not restricted.

Permits for limited daily watering of new lawns are available at the BMU office.

## 2009 Lawn Watering Policy

**FROM June 1<sup>st</sup> THROUGH SEPTEMBER 30<sup>th</sup>**

- Customers with odd-numbered addresses (ending with a 1, 3, 5, 7 or 9) may water lawns on Sunday, Tuesday, Thursday and Saturday.
- Customers with even-numbered addresses (ending with 0, 2, 4, 6 or 8) may water lawns on Sunday, Monday, Wednesday and Friday.

### LAWN WATERING SCHEDULE June 1 - September 30

day	SUN	MON	TUE	WED	THU	FRI	SAT
address	all	even	odd	even	odd	even	odd

#### Water Rate Information:

The regular water rate for city residents is \$1.535 per 100 cubic feet (748 gallons).

Water usage during the winter (December-March) is averaged for each customer, as well as for all residential customers.

During the July, August and September billing periods, customers can use up to three times (300%) their individual winter average, or the city's residential winter average (whichever is higher) and still pay the regular rate.

Water usage that exceeds three times (300%) the individual or city winter average (whichever is greater) will be billed at double the regular rate.
